*Simplified, highly reliable chemistry raises the performance standards in the industry and challenges the competition.*

## Protect your turbine with sodium made simple

Thermo Electron introduces the most advanced low level sodium monitor that not only protects your turbine against destructive sodium levels but this monitor will prove to be the simplest, easy-to-use sodium monitor you have ever used.

- **Fast response** and resistant to drift with the patented Orion ROSS Ultra® electrode technology
- **Easy-to-use** across multiple users with the step-by-step scrolling instruction user interface\*\*
- **Easy-to-read** backlit display provides measurement visibility from a distance
- **No moving parts** with the pump-less passive diffusion reagent system
- **Rapid response** to changes and ultra low level detection with the new patented Flow Cell\*\*
- **Quick** installation and start-up

To learn more or schedule a demonstration for the **Orion ionplus® 2111LL**, call 978.232.6000 or 800.225.1480 or simply e-mail [info.water@thermo.com](mailto:info.water@thermo.com) to see what Thermo can do for you. Visit us on the web at [www.thermo.com/water](http://www.thermo.com/water).
