

Designed to connect directly to the tap water feed, the Thermo Scientific Barnstead E-pure can handle all of your laboratory high volume ultrapure water applications with low operating costs.

Thermo Scientific Barnstead E-Pure™

Produces ultrapure water directly from tap water.

Product Description

- Resistivities up to 18.2 megohm-cm and TOC levels below 10 ppb.
- Virgin polypropylene water pathways prevent recontamination.
- Recirculation pump continuously recirculates water throughout the entire system to maintain water purity and reduce the quantity of waste water required for rinse-up.
- Wall mounted; completely assembled for easy installation.
- 1/4 turn quick release canisters allow for easy cartridge replacement.
- 0.2 micron absolute final filter removes bacteria and particulates that could alter your results.
- Digital resistivity meter is automatically temperature compensated to 25°C, preventing fluctuating resistivity readings due to temperature changes.
- Flow rate up to two liters per/min.
- High capacity cartridges provide low operating cost.
- Point of use or direct feed to analytical instruments or glassware washers.

E-pure 4-holder

Accessories for the Thermo Scientific Barnstead E-Pure

Low Pressure Pump Protector

- In the event that the pressurized feedwater line pressure falls below 5 psig (0.35 kg/cm²), a low pressure pump protector interrupts the power supply to the E-pure system.
- Includes a 1/4" NPT (6.35 mm) T-fitting for installation into water feedline.
- Comes complete with 6' (1.8 m) cord to attach directly to the E-pure system.

Low Water Level Pump Protector

- If feeding from a storage reservoir, it is recommended that a low water pump protector be added to the E-pure system. This ensures that the pump is protected in the event the reservoir water level is too low to satisfy the requirements of the system.
- Adaptable to most storage reservoirs, providing a 1/2" NPT (12.7 mm) connection is available.
- Comes complete with 6' (1.8 m) cord to attach directly to the E-pure system.
