

dNTP Set

Description: Pack of four vials containing each of the following nucleotides: dATP, dTTP, dGTP and dCTP

Ordering Information: AB-0241 dNTP Set 4 x 500µl

Concentration: 5µmoles of each dNTP supplied at 10mM (pH 7.0)

Storage Conditions: Stored at -20°C. Shipped on ice

Application: For primer extension procedures, prepare a dNTP mix and dilute to give a final concentration of 200µM of each dNTP.

For Research Purposes Only
