

Thermo Scientific QMS[®] Immunoassays for Therapeutic Drug Management

Utilizing our world-leading microparticle technology, we offer the largest menu of homogenous turbidimetric immunoassays currently available for Therapeutic Drug Management (TDM) of drugs used in the fields of:

- Epilepsy and Pain Management
- Infection
- Organ Transplantation
- Cardiology

All QMS reagents are liquid-stable, ready-to-use immunoassays with unparalleled quality and reliability. Applications to select general chemistry analyzers are available upon request.

For more information on QMS products, call 1-800-232-3342 or e-mail mgc.customerservice@thermofisher.com.

Enhancing our unique assay portfolio.

QMS Lamotrigine, now available, complements our menu of immunoassays for TDM of drugs used in the management of epilepsy and pain.
