

Discover the power of two working as one.

Introducing the next-generation solution for real-time, online PGNAA analysis of raw materials in cement manufacturing—**Thermo Scientific CB Omni**.

It brings together the technical knowledge, industry experience, and global reach of two leaders, Thermo Fisher Scientific and Analyser Systems, into one highly advanced modular system that offers you the best of both worlds.

The **Thermo Scientific CB Omni** has a new detector design with unprecedented efficiency to help you instantly identify variations in chemistry. It's easy to install and you don't need to cut your conveyor structure. Plus, every CB Omni is backed by a global service team no other team can match.

To learn more, call +1 (800) 488-4399 or +1 (858) 450-9811, or visit www.thermo.com/cement.

New Thermo Scientific CB Omni – for fast, accurate, online raw material analysis to improve cement quality, boost efficiency and lower costs.
