

## We keep you up. We keep you running.

It takes more than accurate, reliable online coating and thickness gauges to keep your plant up and running. It takes the support of onsite service engineers who understand your metals production inside and out—and work with you one-on-one to help solve your everyday challenges.

We go beyond helping you make the most of your Thermo Scientific gauges. We also stand behind you with preventive maintenance programs, 24-hour telephone support, and regional service centers on five continents to keep you moving full speed ahead. We're always nearby to lend a hand.

To learn more, call +49 (9131) 998-0 or +1 (858) 450-9811, or visit [www.thermo.com/metals](http://www.thermo.com/metals).

**Thermo Scientific online gauges—** get the support you need to ensure quality, boost productivity, and control costs.
