

Think outside the metal detector aperture

The *new* Goring Kerr EZx Contaminant Detection System gives you the sensitivity of an X-ray system with the simplicity of a metal detector. If you want to upgrade your current detection capabilities, but were concerned about the cost and complexity of going to X-ray, EZx is the perfect solution.

- No blind spots like traditional X-ray systems
- Multiple aperture sizes—up to 19-inch width
- IP65 washdown is standard
- High capacity—up to 400 packages per minute

EZx, it's going to change the way you look at things.
