

Think outside the metal detector aperture

The *new* Goring Kerr EZx Contaminant Detection System gives you the sensitivity of an X-ray system with the simplicity of a metal detector. If you want to upgrade your current detection capabilities, but were concerned about the cost and complexity of going to X-ray, EZx is the perfect solution.

- No blind spots like traditional X-ray systems
- Multiple aperture sizes—up to 49-cm width
- IP65 washdown is standard
- High capacity—up to 400 packages per minute

EZx, it's going to change the way you look at things.

Call 01788 820300 to request your Goring Kerr EZx Information Kit, including introductory video and specification data.

Or visit us on the web at: www.thermo.com/EZx

Send us a sample of your product for testing in our labs, and we will provide you with real data to help you decide.
