

**NOTIFICATION OF DISCONTINUED PRODUCTS AND LIMITED PARTS
AVAILABILITY**

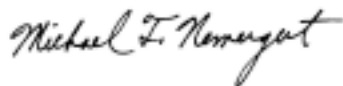

July 25, 2003

Thermo Electron Corporation, Air Quality Products is dedicated to supporting the product, service and repair needs of our customers, and we continually strive to provide you with the best value in products and services. Included in this commitment is the policy of supporting our products for as long as possible. However, this is becoming increasingly difficult. Component obsolescence by our suppliers in the rapidly evolving electronics field, coupled with diminishing demand for older technology, makes it impossible for Thermo Electron to continue the promotion of these products. In instances where this occurs, it is our intention to inform you of products, spare parts and repair services that will be discontinued.

Please take a few moments to review the attached Product Obsolescence Announcement. This document will serve as notice that the products described are, or will be, discontinued, and identifies the level of support you should anticipate in the future. If you have any questions or concerns, please contact the Air Quality group of Thermo Electron shown in the attached document.

We will do all that we can to work with you should you find that one of the items listed in the enclosed notice may hinder your operations. If you are looking to replace your current products, Thermo Electron has a wide variety of new and advanced technology systems to meet your air monitoring needs. Plus, a trade-in program toward the purchase of a new analyzer may be available. Please contact our Sales Department at 508-520-0430 for more details. Your continued success is important to us.

Sincerely,

Michael T. Nemergut
Marketing Manager
