Not your run-of-the-mill gauges.

What are you looking for in non-contact thickness and coating weight gauges?

Quality and performance you can count on? The committed support of an organization with the depth of products and resources to meet your specific needs?

Thermo Scientific systems deliver all this and more. From our high performance RM 312 multi-function thickness gauge for hot rolling mills to the RM 310 EH coating weight gauge, providing the world's fastest coating control feedback for hot dip galvanizing lines, Thermo Scientific products perform—at every stage of the metals production process.

Take a closer look at our metals solutions at www.thermo.com/metals or call +44 (1452) 337-800 (United Kingdom), +49 (9131) 998-0 (Germany), +91 (20) 6626-7000 (India), +52 (81) 8400-7375 (Latin America) or +1 (858) 450-9811 (USA).

Thermo Scientific gauges provide reliability for maximum throughput.
