Important Research Can't Wait

Get started before your stimulus money arrives – with the Future Funds program from Thermo Fisher Financial Services.

Additional grant funding may be available for your academic research. There is no reason to wait to acquire the equipment you need for your research facility. With our Future Funds program, you can acquire your laboratory equipment right now.

Future Funds* allows you to take your time in deciding if your payment plan is right for you. You will have a 3-9 month window to choose whether to buy or lease your laboratory equipment. During this time, you pay only 1% of the equipment cost per month.

Here's how it works:

- Take delivery of Thermo Fisher Scientific laboratory equipment
- Rent the equipment for up to nine months for only 1% of the purchase price/month
- After 9 months, choose to purchase the equipment or convert to an affordable monthly lease payment. (You may choose to purchase the equipment at anytime during the 9 month period)

Within or by the end of the initial window period you may:

1. Purchase the equipment for the originally quoted price, OR,
2. Begin the lease payments as specified in the lease agreement.

Don't hesitate to acquire
your equipment today!

*Program requires credit approval and execution of lease agreement.
