Important Discoveries Can't Wait

Get started before your grant funding arrives – with the Future Funds program from Thermo Fisher Financial Services.

Through the American Recovery and Reinvestment Act of 2009, additional grant funding is available for life sciences research¹. But there's no reason to wait for your grant funding to acquire the equipment you need for your research. With our Future Funds program, you can start using your equipment right now.*

Here's how it works:

- Take delivery of a Thermo Scientific LTQ Orbitrap system or any Thermo Scientific Mass Spectrometer today
- Rent the equipment for up to 9 months for only 1% of the purchase price/month
- After 9 months, choose to purchase the equipment or convert to a convenient 36-month lease. (You may choose to purchase the equipment at any time during the 9 month period.)

Offer subject to credit approval and completion of all required documentation, determined at the sole discretion of Thermo Fisher Financial Services.
