## Thermo Scientific Superslip® coverslips for automation.

We offer a diverse range of standard and premium coverslips for a variety of applications, compatible with all Thermo Scientific slides and specialty glass. From non-sticking Thermo Scientific SuperSlip coverslips to LifterSlips for microarray, we've got you covered.

Superslip coverslips are corrosion resistant and uniformly thin and flat. Our processing techniques result in superior cleanliness. Superslip coverslips are the product you need to make your coverslipper run smoothly. This product combines specialized production methods and moisture resistant packaging to prevent sticking.

Please contact us for samples or additional information at 888.374.3724 or visit [www.thermo.com/slides](http://www.thermo.com/slides).

### **We've Got You Covered!**

Superslip coverslips are ideal for automated coverslipppers and humid environments.
