

Obsolescence Notice

Model 17C

July 25, 2008

Thermo Fisher Scientific announces the discontinuation of the Model 17C Chemiluminescent Ammonia (NH₃) Analyzer effective August 25, 2008. This is the next to last analyzer in the conversion of the C Series to the iSeries.

The Model 17C has a direct replacement in the Model 17i .

Thermo Fisher will continue to support those units in the field with spare parts* and service until August 1, 2015.

Sincerely,

Frank Duckett
