

Shipping Live Cells in OptiCell®

1. Culture cells in OptiCell until log phase (~70% confluent for adherent cells).
2. Pack the OptiCell in an absorbent bag and seal the bag.
3. Place the packed OptiCell in an OptiCell Mailer and tape it securely.
4. Ship the OptiCell Mailer in an appropriate express shipping company package – live cells in OptiCell units should be delivered within 4 days.
5. Replace media with fresh culture media upon arrival.
6. Resume incubation at proper conditions.
